List of the birds seen during the Fixed Departure Tour

October 16-25, 2007

This year's tour was filled with sound and activity as the birds took advantage of the abundance of food. The weather was great for birding and we took advantage of it to cover as much ground as possible, producing **343 species SEEN in 10 days** by the group, including stunning views of Helmeted Woodpecker, a very cooperative Giant Snipe that flew over our heads and landed 5 meters away, Speckle-breasted Antpitta and 6 species of owls, including a wonderful pair of Stygian Owls that were voted by the group as the best bird of the trip.
